

Challenges We Solve

We embrace your tight schedules, declining budgets, increasing cyber threats, and the ever-increasing velocity, variety, and volume of your data, APG takes on these tough challenges in the DoD./Intelligence Communities by delivering today's mission critical information systems. We do so by optimizing COTS integration, accelerating schedules, and reducing program risks, so your solutions reach their full operational capability faster - with more capability, robust security, and greater return on investment.

Our Cleared Veteran Team

As U.S. Military and Intelligence veteran professionals, our highly cleared engineers are dedicated to our nation's defense. Our personnel are deployed across the CONUS, with key program centers in DC, Dayton, Colorado, and California. Drawing inspiration from colleagues now serving our country on the front-lines as well as patriots from the past, we work tirelessly to meet their standards and ensure mission success for your Program.

Proven, Reliable SW Engineering for Your Mission Critical Information Systems

When mission success is paramount, turn to APG for advanced software, systems, and cyber security services consistently delivered with high velocity, mastery of best commercial practice and the utmost integrity. Our services help you turn vast mountains of Big Data into actionable information, with assured timeliness and confidence.

\$\$ High-Velocity Solutions at 30-40% Less Cost \$\$

World Class, Certified Talent at ~40% Less Cost vs. Big Vendor Consulting

With deep technical expertise and mission experience, veteran APG professionals pack big league experience into a lean agile cadre, enabling clients to rapidly architect, develop, and deploy secure, leading-edge software solutions— at roughly -40% less than leading commercial software consulting providers. We simultaneously optimize your existing investments, and accelerate schedules, while reducing your program risks. Therefore, your mission critical information systems can reach full operational capability faster with more functionality, robust security, and greater return on investment (ROI).

Services Leverage Key Integrated Partnerships

We're highly effective in leveraging our commercial "reach-back" partnerships in concert with our award winning System Integrator (SI) relationships (e.g., Northrop Grumman, Boeing, Raytheon, Ball Aerospace, and Exelis). Such world-class leverage enables APG architects to rapidly develop and deploy leading edge software solutions for mission critical information systems in the following key areas:

- Mission critical support to IC/DOD Application Service Providers (ASPs)
- Data Architecture, Information Engineering and Data Science
- High Performance Data Management
- Private Cloud Engineering at the Platform-as -a-Service (PaaS) tier
- Information Assurance & Cyber Security

A Trusted Partner for Mission Success

APG continues to be entrusted to support many of our nation's mission critical information programs. Count on APG to seamlessly integrate into your team environment providing as proven partner dedicated to the fact that mission success is paramount.
